

Global Diagnostic Ultrasound Market is valued at USD 7.0 Billion in 2021

and is expected to reach USD 9.2 Billion by 2028

with a CAGR of 4.0% over the forecast period.

A non-invasive diagnostic method for imaging within the body is diagnostic ultrasound. The sound waves that ultrasound probes, also known as transducers, emit are above the human hearing threshold (above 20 KHz), however, the majority of transducers now in use operate at significantly higher frequencies (in the megahertz (MHz) range). The majority of ultrasonic diagnostic probes are applied to the skin. However, probes may be inserted into the body via the gastrointestinal system, vagina, or blood arteries to improve picture quality. Additionally, ultrasound can be applied during surgery by inserting a sterile probe into the surgical site.

The Covid-19 epidemic has generally had a negative impact on the market. Worldwide interruptions in the medical equipment supply chain have been caused by the epidemic. Some of the top ultrasound market players have experienced supply chain interruptions, particularly as a result of distributors in badly affected growing nations like China, India, Brazil, and others. On the other hand, the lack of locally obtained raw materials or parts has had an impact on the manufacturing capability of a few businesses.

Segmentation-

By Type:

- Stationary Ultrasound
- Portable Ultrasound

By Technology:

- 2D Ultrasound Imaging
- 3D and 4D Ultrasound Imaging
- Doppler Imaging
- High-intensity Focused Ultrasound

By Application:

- Anesthesiology
- Cardiology
- Gynecology/Obstetrics
- Musculoskeletal
- Radiology
- Critical Care
- Others

By End-user:

- Hospitals
- Imaging Centers
- Research Centers

Some of the prime players operating in this business sphere are -

- GE Healthcare
- Koninklijke Philips N.V.
- CANON MEDICAL SYSTEMS CORPORATION
- Hitachi
- Siemens Healthcare
- Shenzhen Mindray Bio-Medical Electronics Co. Ltd.
- Samsung Medison Co. Ltd.
- Esaote
- MXR Imaging
- CIVCO Medical Solutions
- FUJIFILM Healthcare Americas Corporation
- Johari Digital Healthcare Limited
- EDAN Instruments, Inc.
- Olympus Medical Systems India Pvt Ltd
- Toshiba Medical Europe
- Konica Minolta Healthcare Americas, Inc.
- Esaote
